RE: Internship Software Engineer

I am eager to be considered for the software engineer internship with Amadeus which I learned about through my university careers fair. I believe that I am a strong contender for this opportunity as I am currently on track to achieve a 2:1 in my 1st year at the University of Southampton studying BSc Computer Science.

Here is a brief outline of the many personal and professional qualities, skills and competencies I will bring to the Internship:

• Developed and advanced key strengths in java programming, computer hardware and software engineering.
•Achieved a 1st grade of 81% in my foundation year in BSc Mathematics.
•Achieved a grade of 2:1 in my University java coursework.
•Analytical mind to solve complex problems.
•Eager to work as part of a team and expand my skills in all facets of software engineering.

I possess ambition, dedication and drive to fully succeed in this Amadeus internship role. My professional growth is tantamount to a long-term, rewarding career in Software Engineering and I cannot imagine a greater opportunity than this one with Amadeus. Please take a moment to review my attached resume and feel free to contact me for additional information.

Thank you, in advance, for considering my placement for the Software Engineer Internship.

Sincerely,

Brody Walters
